About Company

Recent developments in the material handling industry highlight significant advancements and strategic moves:

Welcome to Rider Hydraulics, an innovative company in the field of industrial material handling equipment. Our dedication focuses on enhancing efficiency and guaranteeing the best suitable quality for each and every product we provide. Our dedication to quality and client happiness motivates us to offer reliable, effective solutions that are customized to meet your demands. You can rely on Rider Hydraulics to provide you with excellent support and top-notch equipment that will improve your operational efficiency.

List of Products

Single structure Hydraulic Goods Lift

capacity : 500kg to 1000kg

Applications: For moving large, bulky goods in factories, warehouses, and retail establishments, single-structure hydraulic goods lifts are the best option. They ensure stability and safety by moving things between levels with efficiency. Common locations for their use are distribution centers, storage facilities, and loading docks, where they improve productivity in logistics and material handling activities.

Double structure Hydraulic Goods Lift

capacity: 500kg to 3000kg

Applications: Double structure hydraulic goods lifts are ideal for heavy-duty uses in factories and warehouses, among other industrial situations. They guarantee stability and safety by facilitating the vertical transportation of heavy objects between several stories. Production lines, storage facilities, and loading bays are frequently used to maximize the effectiveness of material handling and logistical processes.

Scissor Lift

Immovable and Movable

capacity 500kg to 5000kg

Applications: In warehousing, maintenance, and construction, scissor lifts are frequently utilized. For jobs like installing fixtures, making repairs, and moving supplies, they offer secure access to raised regions. They improve productivity and safety in a variety of industrial environments and are perfect for both indoor and outdoor use.

Hand pallet truck

Capacity: 2.5ton,3.0ton,5.0ton

Applications: warehouse, retail stores, distribution centers

High lift pallet truck

Capacity : 1.5 ton

Applications: useful pallet and heavy load lifting and moving, material storage and retrieval, or machine loading

Weighing scale pallet truck

Capacity: 2.0ton,2.5 ton

Applications: weighing, counting, and using a rechargeable battery and power source. It combines the two main purposes of a pallet truck and scale into one mobile device, enabling you to weigh freight however you choose.

Manual stacker

Capacity: 1.0 ton 1.5 ton 2.0ton

Application: supplying the safest and most effective methods for material lifting and stacking

Semi electric stacker

Capacity: 1.0 ton 1.5 ton 2.0ton

Application: One kind of material handling machinery used to raise, transport, and lower loads is the semi-electric stacker. It is best suited for smaller companies as an entry-level material handling system. Additionally, modest warehouses and stores.

Fully Electric stacker

Capacity:1.0ton 1.5ton

Application: Heavy goods are lifted and stacked using material handling equipment called an electric stacker, sometimes referred to as a "walkie stacker." A stacker's main function is to lift and stack big objects like pallets, crates, and other equipment.

Manual Drum trolley

Capacity:350kg

Applications: a mechanical device used to safely grasp and move cylindrical modules, such as barrels, steel drums, plastic drums, and fiber drums.

Drum stacker

Capacity:350kg

Applications: A mechanical device called a "drum stacker" is used to safely grasp, lift, and move cylindrical modules such steel drums, barrels, plastic drums, and fiber drums.

Scissor table trolley

capacity :350kg,500kg, 750kg,1000kg

Applications: Scissor table trolleys increase productivity and safety in workshops, warehouses by lifting and moving large, heavy objects.

Platform trolley

Capacity:250kg to 1000kg

Applications: Platform trolleys are suitable for use in warehouses, manufacturing plants, distribution centers, retail stores,
